SHARMA, SUJATHA R

ART UNIT	PAPER NUMBER
----------	--------------

2684

DATE MAILED: 11/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/671,115	JANG ET AL.	
	Examiner	Art Unit	
	Sujatha Sharma	2684	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4,9,11,12,14,17,18 and 20-34 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4,9,11,12,14,17,18 and 20-34 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1,2,4,9,11,12,14,17,18,20-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raith [WO 98/48577] in view of Beith [US 6,321,098] and further in view of Lee [US 6,181,930].

Regarding claims 1,9,14,18,23-26,27,31,34 Raith disclose a system and method for identifying emergency calls in radio communications system, such as in a TDMA or a CDMA system (see page 3, lines 17-29). Raith further discloses a method of receiving position information from a base station via a forward channel in a roaming mobile terminal (See Page 6, lines 13-15). Raith further discloses a method of varying a searching position on an emergency call-mapping table previously stored in memory according to the received position recognition information. Raith further discloses linking an emergency key (See 260 in Fig. 2) to the emergency call number and transmitting an emergency call using the emergency key.

However, Raith fails to explicitly disclose the storage of the emergency numbers in a phone book.

Beith teaches that the telephone number storage area referred to as "phone book" is included in the non-volatile memory portion of the mobile phone. See col. 3, lines 41-56.

Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to provide the above teachings of Beith to Raith in order that the user in the has the option of activating an auxiliary speed dial directory that provides a convenient quick access file which corresponds to a particular phone book wherein the speed dial directory may contain the emergency numbers

Raith further discloses a method wherein the position recognition information stored in memory is periodically broadcasted through system parameters message form the base station (See summary and See Page 6, lines 13-15). Raith and Beith, however, do not disclose a method where the position recognition information is periodically transmitted through an extended system parameter message (ESPM) of the paging channel.

Lee discloses a method where the base station sends position recognition information in an extended system parameter message (ESPM) of the paging channel. Lee teaches different message groups in a paging channel and as an example teaches the position recognition information to be transmitted via system parameter message but indicates that it could be transmitted via any of the message groups such as extended system parameter message (ESPM). See Fig. 2 and col. 3, lines 1-36.

Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to provide the above teachings of Lee to Raith and Beith in order that any subscriber unit in the coverage area of the ground station may receive the information.

Regarding claim 2, Raith further discloses a method wherein the position information refers to a mobile country code (See page 8, lines 4-6).

Regarding claims 4,29,30 Raith further discloses a method of varying the search position from a previously stored search position on the emergency call mapping table which is shifted to region in which the same position information as the currently received position recognition information is stored (See summary and page 7, line 19- page 8, line 27).

Regarding claims 11,32 Raith further discloses a method of linking a read address of the emergency call number to a one touch dial and making an emergency call by using the one touch dial when an emergency call is inputted (See summary and page 7 line 19 – page 8, line 27).

Regarding claim 12, Raith further discloses a method wherein the position information refers to a mobile country code (See page 8, lines 4-6).

Regarding claim 17, Raith further discloses a method wherein the transmitting step includes directly transmitting the emergency call using emergency key. See page 6, lines 8-25.

Regarding claim 20, Beith further discloses the key to be an alphanumeric key of the phone. See summary of invention, col. 3, lines 3-25 and 41-56.

Art Unit: 2684

Regarding claims 21,33 Raith further discloses linking an emergency key (See 260 in Fig. 2) to the emergency call number and transmitting an emergency call using the emergency key.

Regarding claim 22, Raith further discloses a method wherein the position information refers to a mobile country code (See page 8, lines 4-6).

Regarding claim 28, Raith discloses a method wherein the emergency call mapping table includes position recognition information allocated by countries and emergency call numbers corresponding to position recognition information (See summary and page 7, line 19- page 8, line 27).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rivera-Rodriguez [EP 717,574] Emergency calling from a wireless telephone

Snellman [WO 98/23108] Method and apparatus for accessing telephone numbers

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sujatha Sharma whose telephone number is 571-272-7886. The examiner can normally be reached on Mon-Fri 7.30am - 4.00pm.

Art Unit: 2684

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on 571-272-7882. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
